

Project Design Phase-I

Solution Architecture

Date	30 October 2023
Team ID	B39DA5E75951489BD7B485D2ECFCEA89
Project Name	Farmer Insurance Chain
Maximum Marks	4 Marks

Solution Architecture:

Solution architecture is a complex process – with many sub-processes – that bridges the gap between business problems and technology solutions. Its goals are to:

- Find the best tech solution to solve existing business problems.
- Describe the structure, characteristics, behavior, and other aspects of the software to project stakeholders.
- Define features, development phases, and solution requirements.
- Provide specifications according to which the solution is defined, managed, and deliver
